 PARAFFIN WAXES**
Grade: PW-573

| Specifications | Units | Value | Test Method |
|----------------------------------|-------|---------|-------------|
| Congealing point | Deg C | 57-60 | ASTM D-938 |
| Oil content | %wt | 1.0 max | ASTM D-721 |
| Color , liquid , Saybolt | | 26 min | ASTM D-156 |
| Kinematic Viscosity at 100 Deg C | cst | 3.5-5.0 | ASTM D-445 |
| Needle penetration at 25 Deg C | mm/10 | 13-20 | ASTM D-1321 |

All our products are solvent refined and hydrotreated.

Haifa Basic Oils Limited (HBO) tries to maintain comprehensive and up-to-date Material Safety Data Sheets (MSDS) on all its products. These sheets contain information that may be needed to protect employees, customers and public in general, any known health or safety hazard. HBO advises clients to obtain copies of these MSDS in advance, available upon request from HBO or through your local sales representative.
